

# ASSIGNMENT 3

TEAM ID : PNT2022TMID50578

PROJECT NAME : CUSTOMER CARE REGISTRY

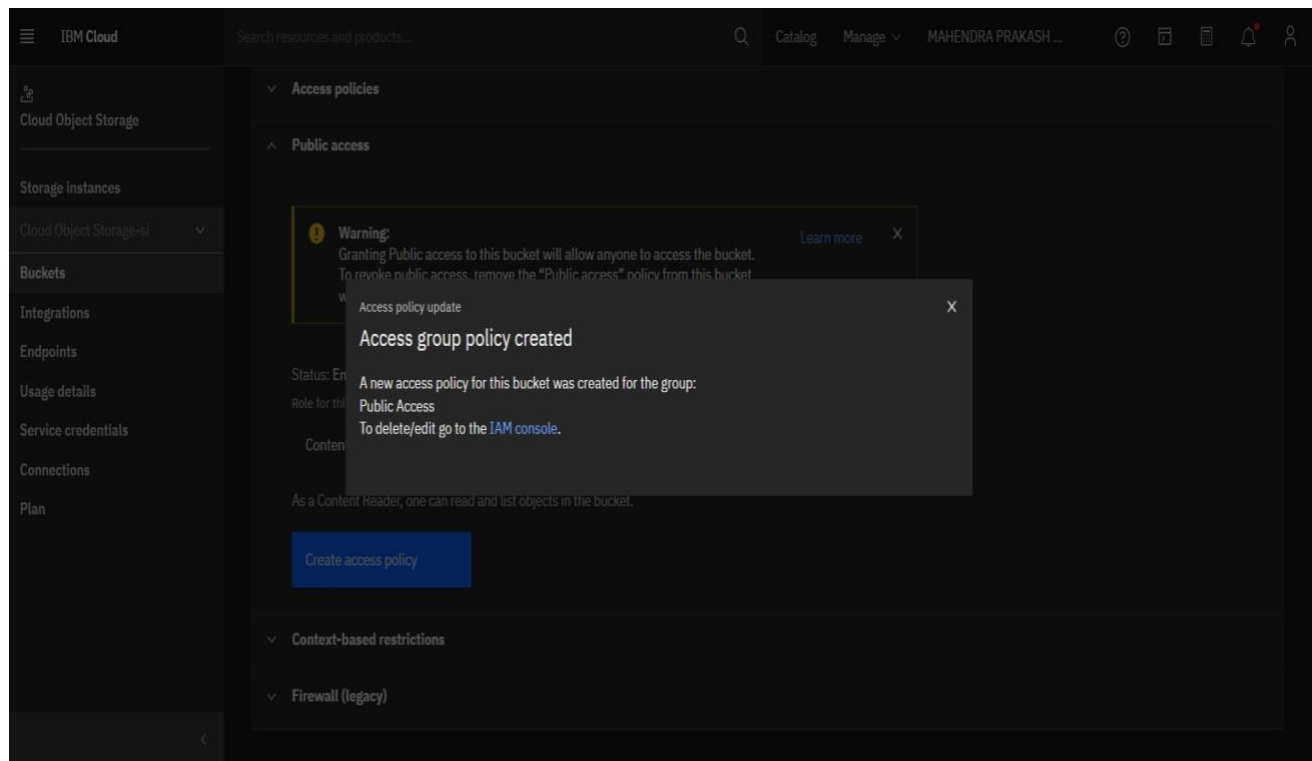

STUDENT NAME : K. SUGUNA DEVI

## Q1. Creating a Bucket in IBM Cloud Storage

The screenshot displays the IBM Cloud Storage management console. On the left, a sidebar menu lists various options: Cloud Object Storage, Storage instances, Cloud Object Storage-si, Buckets (highlighted), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area is titled 'Buckets' and includes a descriptive paragraph: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this, there is a table listing existing buckets. The table has columns for Name, Public access, Location, Storage class, and Created. Two buckets are listed: 'containment' and 'p-na-r-b'. A 'Create bucket' button is visible in the top right corner of the table area.

| Name        | Public access ⓘ | Location ⓘ | Storage class | Created            |
|-------------|-----------------|------------|---------------|--------------------|
| containment | No              | jp-tok     | Smart Tier    | 2022-10-09 7:35 PM |
| p-na-r-b    | Yes             | jp-tok     | Smart Tier    | 2022-10-09 8:04 PM |
